Why Use the SteerClean Service Kit?

SteerClean Solutions will safely flush, clean and condition the Power Steering system to help improve operational performance, help quiet noise and extend component life. Solutions are compatible with all domestic and foreign vehicle power steering systems.

How SteerClean Service Kit Solutions Work

Power Steering Flush Detergent

- ▶ Removes varnish and sludge deposits
- ▶ Increases fluid circulation
- ▶ Helps extend component life
- ▶ Improves steering performance

Power Steering Fluid Conditioner

- ▶ Specifically formulated to use with all Power Steering Systems
- ▶ Contains anti-wear agents and detergent additives
- ▶ Protects against wear and noise
- ▶ Conditions seals

Marketing and Training Support

- ▶ MotorVac will provide point-of-sale marketing materials including posters, sales promotion displays, and pamphlets to maximize shop sales.
- ▶ Training CD's & videos, product specification sheets, and media kits are available for complete training support.

Why Use the MotorVac SteerClean System Works?

Though the service can be performed with or without a machine, we recommend the use of the MotorVac SteerClean (MPS 7100) to achieve the highest quality of service. The SteerClean machine conducts an efficient and thorough PSF exchange and conditioning service. Facilitates a "one-man" operation, and the technician only needs to add the detergent flush solution and the new power steering fluid with the conditioner to the machine.

Once this is done, just press the Start switch and the SteerClean machine performs a complete exchange in just minutes. Once the exchange is complete, check the fluid level and tighten the cap to finish the service. The SteerClean is very user-friendly, portable and operates with 12-volt DC power. Its quality castors provide excellent maneuverability and the roto-molded cabinet is easy to keep clean and will not damage the vehicle.

Features

- ▶ Non-Hazardous
- ▶ Non-Flammable
- ▶ Non-Carcinogenic

Benefits

- ▶ Quieter Steering Operation
- ▶ Removes Debris and Contaminants
- ▶ Helps Prevent Future Leaks
